STURDY BASE & SOFT SIDES

Best Seller!
The Ski Sheet®
The Ski Sheet stores under mattress, easily accessible for emergency evacuation. Moves non-ambulatory patients quickly, allowing patients to remain in bed. Belt storage pockets, mattress corner loops, strong seat belt type securing straps, quick release buckles with handles, machine washable. Suggested capacity 350 pounds.
ITEM # SKISH04

NEW!
STURDY BASE

The Ski Slide Pad®
The NEW Ski Slide Pad® has built in slide sheets and a polyethylene base for easy transfer and movement. Designed for use in areas of restricted space, such as congested hospital wards, care homes and other buildings with narrow corridors and/or single width fire doors. The main feature of the Ski Slide Pad is the built in slide sheet, which is fitted on both sides of the pad for ease of transfer from bed/floor onto the pad — this is especially useful for individuals who require greater assistance during the transfer process. The slide sheets can also be used as an extra cover, where exterior evacuation is required.
ITEM # SKISLP15

The Ski Sled®
The Ski Sled has been designed for use in confined areas, where space is limited, such as congested hospital wards and buildings with narrow corridors or single width fire doors. In the event of an emergency, the Ski Sled is easily removed from its storage bag. The individual is quickly transferred onto the Ski Sled and then secured in place with seatbelt style straps. The tough, slippery base (which is different to that of the Ski Pad) enables individuals to be moved easily over virtually any surface, indoors or outdoors. The foam pad and the internal nylon support struts give protection to the individual while being moved.
ITEM # SKISLO8

The Ski Pad®
The Ski Pad is a symmetrical device designed for use where mattress evacuation is not an option due to narrow hallways/staircases. Adjustable cross straps, high quality metal buckles, pockets at head and foot for pillows or feet. Ski Pad has a 2” foam filling/vinyl base. Add-ons such as extra straps or thicker padding available. Stored 28” x 27” x 6”, open 78” x 28” x 2”
Suggested capacity 350 lbs. ITEM # SKIPD05

The Evac-E-Pad®
The Evac-E-Pad is an economical version of the Ski Pad. A two person symmetrical device designed for evacuation where mattress evacuation is not an option due to narrow corridors or staircases. Adjustable cross straps, high quality plastic buckles, a pocket the feet. The pad is made of 1.5” thick foam with a vinyl base. Cushioned pad is soft and gentle for patients whom may require special handling (ie surgical/maternity) Stored 25” x 24.8” x 6.7”, Opened 78” x 27”
Weight capacity 350 lbs, unit weighs 5.5 lbs.
ITEM # EVACEPD14

We are the exclusive North American distributor for Hospital Aids UK Evacuation Devices. Hospital Aids has been the premier manufacturer of quality equipment for over 30 years.

A revolutionary product for the safe evacuation of newborns. Evacu B® provides one nurse with the ability of evacuating six babies and glide down stairs with no bouncing! It can even travel up stairs with two nurses.

- Newborns are placed in pockets made of a fire retardant and mildew resistant material. Their heads are then secured in adjustable headrests.
- If a nurse needs to stop on the stairs, releasing the Reversible Brake Handle will automatically stop the chair. Once safely outside, all six babies can be left inside the unit.

Item # EVACUB

New! Optional Six Way Oxygen Splitter

Safe Babies Basket®
For easy, safe evacuation of premature and newborn babies or infants in the event of a fire or emergency. The unit can carry up to 2 babies. Adjustable carrying straps. Babies can be easily tended to (fed/changed) while in device. Now available with center Velcro strap to secure babies and clear ID card holder. Babies can remain safe inside cot until danger passes. 26in long, 13in wide, 10.5 in deep, folds flat and comes with storage bag. Holds up to 50 pounds.

Item # BUSC001

Baby Mover®
Up to 3 babies can be evacuated at the same time. Designed for up to 60 lb total weight. Hands free to open doors etc. Perfect for daycare.

Item # BBMOVR

TabEvac®
The TabEvac® is designed for the easy and safe evacuation of premature and newborn babies in the event of fire or emergency. Made from strong, cotton drill material, it has foam padded shoulders, color coded binding and side ties. It comes with either a large single pocket pouch on the front or twin pouch pocket. There are three further pockets on the front and a cylinder pocket on the back.

Item # Single Pouch: TAB001
Twin Pouch: TAB002

S-capeKids®
S-capeKids is designed for newborns, infants and toddlers. Perfect for daycares. Four securing pouches.

Item # SCAPEKIDS37

Kiddie Litter®
The Kiddie Litter was developed for emergency evacuation of babies from the nursery or other locations in hospitals in a safer manner than anything available anywhere else. It is an insert that fits in the Hazmat/Hospital Sked Stretcher. It features four warm Papoose like pockets that are adjustable for the baby sizes. There is a little hood over each pocket that keeps the baby’s head warm and keeps the baby in the pouch if the head end of the stretcher gets lower than the foot end. The babies are carried in line with the Kiddie Litter rather than across to allow for different size babies and to prevent neck injuries during evacuation.

Item # KDLIT

GREAT for DAYCARE CENTERS

We’ll Show You a Way Out!
**S-capePod Evacuation Sheet**

“Independence First has turned to Advanced Egress Solutions several times for expert advice on helping people with disabilities with evacuation related needs. Lynn is knowledgeable and willing to take the time to ensure that we get the right information. Her company is our “go to” resource for all egress related equipment and questions.”

- Cindi Pichler, Assistive Technology Program Manager

“The article “Watching Your Back” (November JEMS) discussed how new products are finally being developed to help us move patients in a safe manner. The AlbacMat Rescue Mat by Advanced Egress Solutions is a great example of such a product. This flexible rescue mat is designed to allow as few as one person to safely and effectively move a patient across any surface or terrain, indoors or out. Available in 3 sizes: standard, large and bariatric, the mat can be used on patients of all sizes, from children to adults up to 1,030 lbs. The bottom of the mat is made of a polypropylene board that slides easily and adds to patient comfort by absorbing any bumps along the way. The built-in foot rest pocket provides comfort for the patient and allows for safe movement up and down stairs. 11 separate handles add to the versatility of this rescue mat.”

“You cannot escape the responsibility of tomorrow by evading it today.”

- Abraham Lincoln
